## FEATURES

GUN METAL	The Gun Metal finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.
-----------	--

PHANTOM BASE 20 mm	The Phantom BASE sink's bottoms are specifically engineered to be coupled with sinks made out of slabs. The perimetric trough makes for a simple and perfect installation. This version of Phantom BASE is meant for slabs of 20mm thickness.
--------------------	---

PHANTOM BASE WITHOUT WELDING	The steel bottom Phantom BASE solves the problem of water draining of slab sinks, because the slope built into the moulded bottom ensures perfect draining. The radius and sloped profile of Phantom BASE guarantee great practicality and hygiene in everyday cleaning.
------------------------------	--

High thickness	1.5 mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.
----------------	--

Small radius	Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme practicality.
--------------	--

Basket 3,5" waste fitting	The drain is equipped with a large 3.5" drain, with the practical basket cap that prevents the discharge of solid parts.
