## FEATURES

|                                     |  |
|-------------------------------------|--|
| Diamond-shape bottom                | The draining of water is an important feature in a sink, and it's always taken good care of in Foster products. In the bent-welded sinks, which would have a flat bottom, the proper draining is guaranteed by the elegant beveling, which helps the water flow.   |
| High thickness                      | 1.5 mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.   |
| Basket 3,5" waste fitting           | The drain is equipped with a large 3.5" drain, with the practical basket cap that prevents the discharge of solid parts.   |
| Triple recess - sliding accessories | The Foster Milano sink has an ingenious design that makes it simple to use a large set of optional accessories. On the topmost supporting step, the innovative Black grids slide, creating a large and practical surface to rinse food and crockery. The second step is meant to support and allow the sliding of a complete combination of accessories, which make some operations practical and safe: rinse, drain, slice, grate... everything can be done inside the sink. The third supporting step is on the bottom of the bowl. On this step one can rest the Black grids, making it possible to rinse foodstuffs without their coming in contact with the bottom of the sink, which may be dirty. |

## TECHNICAL DATA

## Leonardo Optional accessories

The "rails" system makes it possible to use a combination of numerous accessories. Grids, chopping boards, utensils' ranging system, bowls and containers of different dimensions can be alternated in the workspace with a simple gesture, and can easily be stacked, in order to be on hand at all times.
