FEATURES

GOLD	The Gold finish is obtained by treating the steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement in the mechanical properties of the steel that is more resistant to shocks and scratches.

Rotating angle	All the taps have a wide angle of rotation. Some models even permit a full 360° rotation.
----------------	---

Strenghtening plate	Foster's mixer taps are equipped with the strenghtening plate that offers perfect stability on any sink.
---------------------	--

Double jet (flow and rain)	Several models are equipped with a switch to easily change the flow from continuous to shower.
